

**National Interagency Coordination Center
Incident Management Situation Report
Saturday, August 13, 2022 – 0730 MDT
National Preparedness Level 3**

National Fire Activity:

Initial attack activity:	Light (180 fires)
New large incidents:	4
Large fires contained:	4
Uncontained large fires: **	28
Area Command teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	4
Type 2 IMTs committed:	9
***Complex IMTs committed:	0

***Complex Incident Management Teams (CIMTs) are configured to respond to large, complex fires and can expand and reduce staffing in all functional areas as necessary to meet the needs of the incident.

Nationally, there are 47 fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

*1 Hectare = 2.47 Acres

Predictive Services Discussion: The upper low off the Washington coast will likely move onshore in British Columbia, with weak troughing extending into northern California, Inland Northwest, and western northern Rockies. This will likely bring gusty Cascade Gap winds (15-30 mph) amid lowering relative humidity (10-30%), with holdovers a concern after the recent abundant lightning. Gusty winds amid low relative humidity may also develop across portions of southern Oregon into northeast California, northwest Nevada, and southwest Idaho near a weak cold front. Dry and breezy conditions may extend into the Idaho Panhandle and northwest Montana, with dry and breezy conditions forecast again for portions of the central Plains.

Isolated to scattered mixed wet and dry thunderstorms will likely continue across eastern Idaho into western and central Montana. Scattered to widespread monsoon thunderstorms will develop over much the Southwest into southeast California and northward through the central and eastern Great Basin and central Rockies. Scattered to widespread thunderstorms are also likely across the southern half of Texas and Gulf Coast into portions of the southeast Atlantic coast.

Avoiding Fuel Geysering

Miscellaneous Fireline Hazards Category

Fuel geysers continue to be reported and the potential for injury is real. In 2018, there were 28 incidents of fuel geysers reported: 23 chainsaws, a leaf blower, and four jerry cans. A fuel geysers can happen on any equipment with a fuel tank including fuel bottles and containers. Even chainsaws with two-way vents may “geyser” at high temperatures or high elevation. User should assume all gas-powered equipment and fuel containers are pressurized.

Fuel – Know Your Fuel

- Fuel volatility changes seasonally and geographically.
- Think locally. Using fuel from a cooler climate (i.e., Idaho) in a warmer climate (i.e., Texas) increases the geysering potential.
- As elevation increases, boiling point temperatures decreases. 125°F at 8,000 feet is approximately equivalent to 140°F at 1,000 feet.

Fuel Bottles and Containers

Fuel bottles (i.e., Sigg bottles), fuel containers (i.e., dolmars or jerry cans) can geysers even after the cap is removed. To mitigate possible fuel geysers and/or potential injury from fuel bottles and cans, use the following procedures:

- Keep containers in the shade and away from any external heat source.
- Never open a fuel tank within 20 feet of any heat source.
- Gently shake the container to release surface tension. Too much agitation will create pressure.
- Open container slowly, pointing opening away and cover the opening with a cloth and glove.

Engine Powered Equipment

- Never use fuel that was stored in a fuel container for longer than one month. Older fuel may lead to poor engine performance and increased operating temperatures. Older fuel may also have higher volatility for the current conditions.
- Always check fuel level in the tank before taking any action. Fuel levels above ½ tank are more likely to geysers.
- Never open a fuel tank within 20 feet of any heat source.
- Only after the above mitigations are completed; put the equipment in a cleared area, cover the cap with a cloth or glove, and open slowly.

For more information or if you experience a fuel geysers, see the Fuel Geysers Awareness section at <https://www.nwccg.gov/committees/equipment-technology-committee>
